PROFESSIONAL SUMMARY

Computer Science undergraduate with experience in **Java, full-stack development**, and **AI-driven projects**. Passionate about building **scalable solutions** using modern technologies while continuously enhancing technical and analytical skills.

EDUCATION

VELLORE INSTITUTE OF TECHNOLOGY

Bachelor of Technology

2023-2027

Major in Computer Science and Engineering

Cumulative GPA: 8.98/10

Relevant Coursework: Data Structures and Algorithms, Database Management Systems, Operating Systems

TECHNICAL SKILLS

Programming Languages:	Java, Python
Web Development:	HTML, CSS, JavaScript, React.js, Node.js, Express.js
Frameworks and Libraries:	Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow
Tools & Platforms:	Git, Firebase, Supabase
Database:	MySQL, MongoDB

PROJECTS

FLARE- FULL STACK DELIVERY APP (*React.js, Node.js, Express.js, MongoDB, Firebase*)

[Link](#)

- Designed and developed a **full-stack application** for grocery, food, and sports item delivery.
- Implemented **secure authentication** and **role-based access control** (admin, vendor, customer).
- Built a **dynamic shopping cart** with **real-time updates** to improve checkout flow and architected the system to be scalable for handling larger order volumes in the future.

TRENDMIND- AI MODEL DISCOVERY PLATFORM (*React.js, Firebase, Material UI*)

[Link](#)

- Engineered a web app for exploring, comparing, and discovering **trending AI models**.
- Delivered **user authentication** for personalized model access.
- Developed detailed **model cards** with **performance metrics** and **side-by-side comparison features** while designing a responsive React.js interface for accessibility across devices. .

NETWORK SCANNER (*React.js, Node.js, Express.js, MongoDB*)

[Link](#)

- Devised a **full-stack network scanning application** to identify active devices, open ports, and operating system details within local networks.
- Architected backend scanning workflows using **Node.js** and **Express.js** to automate **network discovery** and improve detection accuracy.
- Crafted a **React.js dashboard** for **real-time visualization** of scan results with an intuitive and responsive user interface.

TOURWEAVE- AI POWERED COLLABORATIVE TRAVEL PLATFORM (*React.js, Supabase, PostgreSQL, OpenRouter API*)

[Link](#)

- Created secure onboarding using **Supabase Auth** (OTP Magic Links, Google OAuth) with **PostgreSQL + RLS** for protected itinerary data.
- Structured multi-day travel planning with **real-time itinerary sync** using **Supabase WebSockets** for seamless collaboration.
- Integrated **OpenRouter API (GPT-4o-mini)** with **prompt engineering** to deliver localized historical insights in English and Hinglish.

CERTIFICATIONS

- IBM** - Cyber Security Analyst (Network Security, Risk Analysis, Threat Detection) [Link](#)
- IAMNEO** – MERN Stack Developer (MongoDB, Express.js, React.js, Node.js) [Link](#)
- IBM** – Data Analysis with Python (Data Wrangling, Data Visualization, Statistical Analysis) [Link](#)
- IBM** – Databases and SQL for Data Science with Python (Relational Databases, Joins, Data Analysis with SQL) [Link](#)
